

Healthcare Solutions

*Identification and Security Solutions for Enhancing security,
Integrating data and Reducing costs*

At **GetData Technologies** we know that your needs are unique. Our healthcare solutions are designed with the flexibility to conform to your Identification and Security specifications. Our integration technologies enhance the functionality of your existing database information by integrating Human Resources, Time and Attendance, Access Control and other information and security systems.

Wristband Systems

One-step printing of standard ID information and Photos with Barcodes or RFID Encoding with patient data. Encoded data can include simple ID information such as name and social security number or sophisticated information such as allergies, medications, or procedures to be performed.

Visitor Control System

The system provides total control of visitor access to specific floors and rooms. Administrators can adjust limits and predefined passes as needs change. Reports of who, when and where visitors have been, as well as expired passes can be viewed and printed.

*Dual side printing; 1 mil
Laminate on both sides for
outstanding durability.
Hologram, UV and Secure
Laminates available.*
