

Identification Solutions

A single source for all your identification needs

At **GetData Technologies** we understand the importance of selecting an ID system. From stand alone systems to enterprise solutions, we can provide you with the right products and services. Our goal is to provide Identification Solutions that are tailored to our customers' unique needs.

As leaders in integration and customization, we offer seamless integration to your ID System with Human Resources, Time and Attendance, Access Control and other auxiliary systems.

Software

GETDATA'S ID MANAGEMENT SUITE is a complete photo ID software application. ID/Suite combines identification card design with image and data management tools, providing you with an advanced and easy to use photo ID card issuance application. The software runs networked or stand-alone using any ODBC compliant database.

Complete Photo ID Systems

ID Systems

GetData Technologies offers a full line of software, printers, accessories and supplies along side our professional services. Select the right components to configure the right system for you. You can easily and seamlessly expand or upgrade your system as your needs change.

With our vast experience with the various industries, we have configured different systems based on volume and requirements.
