

IDMS - Visitor Control Module

IDMS with Visitor Control Module provides a complete solution to effectively control visitors and manage processing. Pre-register visitors; print professional quality badges; track entry and exit, persons visited and locations; control the number of visitors to any location. Once a visitor is signed in, a permanent electronic record of the visitor's transaction is stored.

Features

- Intuitive user interface-reducing training time, keystrokes and errors
- Point and click searches and queries
- Reports of Visitor check-in and check-out, locations and persons visited
- Automatically shows expired passes, and ability to print list
- Predefine passes to restricted locations and expiration date and time
- Special Events Passes
- Configurable single and batch card printing
- Barcodes and Magnetic Encoding
- Photo, signature, fingerprint and document capture
- Photo Search
- Multi-Level user security
- Data Entry Screen Design
- Easy drag & drop (WYSIWYG) design tools
- Import and Export to and from any ODBC compliant database, and ASCII text files
- Compatibility with any ODBC-compliant database (SQL Server, Oracle, MS Access,...)
- Stand-alone or networked
- Seamless integration and interface with external systems

Minimum System Requirements

- 233 MHz CPU with 64 MB RAM , CD-ROM Drive, SVGA Monitor
- MS Windows 95, 98, NT 4.0 (requires Service Pack 5 or higher), MS Windows 2000 (requires Service Pack 2), ME, or XP
