

ID Management Suite with Visitor Control

IDMS with Visitor Control Module provides a complete solution to effectively control visitors and manage processing. Pre-register visitors; print professional quality badges; track entry and exit, persons visited and locations; control the number of visitors to any location. Once a visitor is signed in, a permanent electronic record of the visitor's transaction is stored.

Fully Automated Process

The software reads information stored on U.S., and Canadian driver's License, US Military IDs, and Social Security Cards, using OCR, magnetic stripe or PDF-417 bar code technologies. Instead of manually entering data to register volunteers, validate identities or create visitor IDs, an operator simply scans a driver's license the software decodes and parses information stored on the ID scanned. The decoded data is then automatically enrolled and the user is prompted to save the Photo or signature if available. The operator then prints an ID Card.

GetData Technologies Monitoring Report Until 10/2/2005			
Last Name	First Name	ID Number	
Roberts	Jill	12345	
ID Issue Date: 1/10/2002			
ID Expiration Date: 11/10/2005			
Most Recent Transaction:			
Date and Time:	9/29/2005 4:37:29 PM		
Type:	IN		
Location:	Forest Hill		
Visiting Who:	Hisham AbuKhaybeh		
Transaction Date	Transaction Type	Location	Visiting Who

Date and Time:	9/29/2005 5:30:55 PM		
Type:	IN		
Location:	Forest Hill		

Verify ID

The software application allows you to verify and track entry and exit of visitors and personnel through out the facility. Multiple locations can be setup as access points to monitor and control incoming and outgoing activities.

The photo along the demographic information is retrieved and verified for access to that area. A log is created of all entry and exit transactions. In and Out lists and reports can be instantly generated.

ID Management Suite *with* Visitor Control

Hardware Options

- Driver's License scanners
- Passport scanners
- Digital Cameras
- Signature capture devices
- Fingerprint capture and verifier devices
- Visitor Badge Label printers
- ID Card Printers

Features

- Intuitive user interface-reducing training time, keystrokes and errors
- Point and click searches and queries
- Reports of Visitor check-in and check-out, locations and persons visited
- Automatically shows expired passes, and ability to print list
- Predefine passes to restricted locations and expiration date and time
- Special Events Passes
- Configurable single and batch card printing
- Barcodes and Magnetic Encoding
- Photo, signature, fingerprint and document capture
- Photo Search
- Multi-Level user security
- Data Entry Screen Design
- Easy drag & drop (WYSIWYG) design tools
- Import and Export to and from any ODBC compliant database, and ASCII text files
- Compatibility with any ODBC-compliant database (SQL Server, Oracle, MS Access,...)
- Stand-alone or networked
- Seamless integration and interface with external systems

Minimum System Requirements

- 233 MHz CPU with 64 MB RAM , CD-ROM Drive, SVGA Monitor
- MS Windows 95, 98, NT 4.0 (requires Service Pack 5 or higher), MS Windows 2000 (requires Service Pack 2), ME, or XP
